WindPaddle Sails

Kayaks
Canoes
Inflatables
Sit-On-Tops

Hello from **WindPaddle Sails**. Our sails are sold world-wide and used in all types of water and wind conditions. Because of their light weight, simplicity, ease and speed of launching and efficient design they have become the best-selling kayak and canoe sail the world over.

Our background is with sailboats and sailing dinghies, and being from Hood River, Ore.

we know wind. We know how much fun and how useful a good breeze can be. We also know how things can turn bad

when everything doesn't go as planned when sailing. With this in mind we designed a sail that was 1) Quick and easy to deploy, and 2) Even quicker and easier to douse or put away so you can stay out of trouble if the wind comes up. A flogging, out of control sail is nobody's idea of a good time.

Our sails perform well because they help a kayak or canoe do what they are best designed to do. Basically remain a paddle craft while sailing off-the-wind without any alteration to your boat. As stated in a recent product review; **“You can use it on any craft and it doesn't turn a kayak or canoe into a complex, heavy sailing craft.”**

Here's why **WindPaddle Sails** are now the worlds best selling kayak and canoe sails:

- Connects to **existing deck hardware** (No drilling, fastening, screwing or gluing required)
- Lightweight design
- Quicker to fasten to the boat and launch
- Safer due to the **low center of effort**
- Switches quickly and easily from boat to boat
- Only sail that works well and fits on folding kayaks and inflatables. We hope you enjoy using our sails.

Nick M. Wiltz (Owner and Inventor)

“SCOUT”

Our newest sail, the *WindPaddle “Scout”* was added to our line-up as an entry level sail to be used in low-medium winds. Solo kayakers will appreciate its ease of use, light-weight and forgiving manner. Built for the casual or recreational paddler in mind, the “Scout” is the lightest, most affordable and easiest to use sail currently on the market.

We built this sail with a soft batten that holds sail shape, yet is pliable enough that it almost coils/folds itself!. For an entry level sail that will pull you quickly downwind yet easy enough for kids 8-80 to handle, the “Scout” is the sail to own.

Target boat – Solo rec. boat to Touring kayak, SOT 8 – 15 feet.

Target wind range – 4 to 13 knots

Target paddler – novice to intermediate

Off-wind sailing envelope – approx. 150 degrees

Tech corner: Scout

Deployed diameter - 42" (106.7 cm.)

Coiled/folded diameter - 15" (38.1 cm.)

Sail area - 9.62 sq. ft. (0.8937 sq. m²)

Weight - 12 oz. (0.34 kg.)

Price - \$139.95 USD (MSRP)

“ADVENTURE”

Our **BEST SELLING sail** intended for the serious sea-kayaker. This is the sail for expeditions on big water and will be pulling hard long after you are ready to head to shore. The “**Adventure**” will withstand any condition you throw at it. The sturdy and unbreakable perimeter batten maintains sail shape in high winds and allows for high sailing angles.

All *WindPaddle* sails launch and fly from the on-deck position. It can be set up for instant self-launching either before sailing or while out on the water so there's no need to return to shore to launch your sail!

Target boat – Touring and Expedition boats 14’ – 18’

Target wind range – 5 – 30 knots (has seen 40+ knots!)

Target paddler – intermediate to expert

Off-wind sailing envelope - +180 degrees

Tech corner: Adventure sail

Deployed diameter - 42" (106.7 cm.)

Coiled/folded diameter - 15" (38.1 cm.)

Sail area - 9.62 sq. ft. (0.8937 sq. m²)

Weight - 13 oz. (0.37 kg.)

Wind Range - 4-30+ knots of wind. (2-6 BFT)

Price - \$169.95 USD (MSRP)

“CRUISER”

The most powerful sail in our lineup, the “Cruiser” is intended for larger, heavier boats that need and can handle more power from the wind. At a bit over 1.5 m² the *WindPaddle* “Cruiser” has the power to pull along heavier boats loaded with gear or people. This sail retains its shape in high winds and doesn’t turn a kayak or canoe into a complex, heavy sailing craft. All *WindPaddle* sails launch and fly from the on-deck position. You can swap the sail from boat to boat while out on the water! The sail instantly self-launches from its snug place on the boat, so there’s never a need to return to shore to rig or launch this sail!

Target boat – Kayaks, Canoes, Inflatables, Tandems and Expedition boats 14’ – 18’

Target wind range – 5 – 30 knots (2-7 BFT)

Target paddler – intermediate to expert

Off-wind sailing angle - +180 degrees

Tech corner: Cruiser sail

Deployed diameter - 56" (142.24 cm.)

Coiled/folded diameter - 20" (50 cm.)

Sail area - 17.1 sq. ft. (1.589 m²)

Weight - 22 oz. (0.6237 kg.)

Wind Range - 4-31 knots of wind. (2-6 BFT)

Price - \$219.95 USD (MSRP)

Colors:

- Red 
- Blue 
- Yellow 
- Lime Green 
- Florescent Orange 

Coils and stows compactly on deck

WindPaddle sails are successful in the world wide market because of their light weight, simplicity, ease and speed of deployment, and efficient design.

The *WindPaddle* was designed to be an off-the-wind sail that easily propels your boat within a 180 degree envelope, achieving full paddling or “hull” speed. You **CAN** paddle, brace and steer while sailing with all *WindPaddle* sails

We offer three sail models

- **Scout**—for Recreational boats
- **Adventure**—for Touring, Sea and Expedition Kayaks
- **Cruiser**—Tandem kayaks, Canoes and Inflatables

Testimonials

"[The] *WindPaddle* Adventure model is a 9 out of 10 for pure fun. This is a very clever kayak sail that is simple to use and totally portable from kayak to kayak..." **PADDLING.NET**

"The charm of the *WindPaddle* sails is their simplicity and ease of use. You are always free to brace or simply drop the sail and paddle within moments..." **PLAYAK.COM**

"In summary, a well designed, sturdy and easy to use sail that takes little effort to set up, hardly any space in the boat and no time to deploy. “ **Pete Bursnall (UK)**

"Nick Wiltz...has come up with a new design, the *WindPaddle*, that solves many of the problems associated with kayak sails..." **WAVELENGTH Magazine**
